LOYALTY

It is a wonderful attribute—and it should find its place in a bank perhaps even more than in any other commercial establishment.

Loyalty characterizes this bank in every phase of its activities—loyalty of personnel to the institution—loyalty of executives to patrons and friends—loyalty of the bank to the community.

And we are proud to say that our thousands of depositors, patrons and friends have shown a wonderful spirit of loyalty to the Bank of America.

Concrete paving will keep ruts and bumps off your street

Santa Ana Considers Concrete the Aristocrat of Pavements

Like many other California cities, Santa Ana is noted for its fine streets.

More than half of these, covering approximately seventy-five miles, are paved with portland cement concrete, the firm, rigid, unyielding pavement with the pleasing, light gray color that always keeps its true surface.

Santa Ana people consider concrete the aristocrat of pavements. They know its non-skid surface is safe the year round.

In commending the service concrete streets have been giving Santa Ana, J. W. Tubbs, President, Board of Trustees, says:

"We have found Portland Cement Concrete streets cheaper, and maintenance cost less, than any other type of paving."

Isn't that the kind of street pavement for any town?

All of the facts are in our free booklet on "Concrete Streets." Ask for your copy.
